

## ABOUT US

We've been actively trading the stock market since 2017, with years of hands-on experience across multiple asset classes. What began as a passion for equity trading has grown into a full-fledged trading and training academy built on one core principle — Price Action. Our journey started with equity trading, then gradually expanded into Options, and today, we also successfully trade in the Forex market. Over time, we've crafted and refined our own personalized trading strategies — designed to work across different markets, timeframes, and conditions.

At The Trading Titans Academy, we don't just teach textbook concepts. We share the exact frameworks, strategies, and psychology that we use in our own trading. Whether you're a beginner or a trader looking to level up, our training is structured to take you from basics to advanced levels — all based on pure price action, without any dependency on indicators. No fluff, no false promises — just real, practical trading education backed by experience.
